

APPENDIX A

PHOTOGRAPHS

Photo 1 (June 6, 2000): View (to the west) of the transmission line alignment at the Rio Grande River crossing location from the site of Structure No. 2, with Mexico in photo background. Water level of Rio Grande not visible due to approximately 25-foot high bank from river to top of channel bank. River's edge (east bank) is approximately 220 feet from Structure No. 2. The anticipated tie with the existing 69/138 kV transmission line owned by CFE can be seen in the background at the transmission line tower (center of photo).

Photo 2 (June 6, 2000): View (to the west) of Rio Grande River crossing, approximately 70 feet west of Structure No. 2. Photo shows area of river to be spanned by the transmission line, with view of Mexico and CFE tie, also shown in Photo 1.
